02	CA	DEC-CA	02-DEC-CA	Jeans	Levi's	₹ 50.00	50	₹ 2,500.00	Fashion	STANDARD			
09	FR	JUL-FR	09-JUL-FR	Watch	Casio	₹ 100.00	20	₹ 2,000.00	Accessories	STANDARD			
Dataset													
QUESTIONS													
1) The total price of all products in the dataset													
2) How many products exist in the dataset													
3) The average price of the products													
4) The minimum price among all products													
5) The maximum price among all products													
6) SUMIF function to calculate the total price of products in the Electronics													
7) COUNTIF function to determine the number of products with a price less													
Duplicates entries													
Laptops (HP)													
Laptops bags													
headphones (But differences in price so I have mentioned both prices)													

FINDINGS AND FORMULAS USED –

1) .The total price of all products in the dataset	₹ 2,64,200.00	SUM(I2:I33)
2).How many products exist in the dataset	32	COUNTA(E2:E33)
3).The average price of the products	₹ 8,256.25	AVERAGE(I2:I33)
4).The minimum price among all products.	₹ 30.00	MIN(G2:G33)
5).The maximum price among all products.	₹ 1,000.00	MAX(G2:G33)
6).SUMIF function to calculate the total price of products in the Electronics category.	7100	SUMIF(J2:J33,"ELECTRONICS",G2:G33)
7).COUNTIF function to determine the number of products with a price less than \$100.	10	COUNTIF(G2:G33,"<100")
Duplicates entries		Rows
Laptops (HP)	11 and 33	
Laptops bags	16 and 23	
headphones (But differences in price so I have mentioned both prices)	15 and 28
